

CAVE CALS FOR COACHES

Clients who actually track.

An iPhone calorie and macro tracker simple enough that clients stick with it, plus a one-page weekly recap they can send you every Sunday.

Your clients get

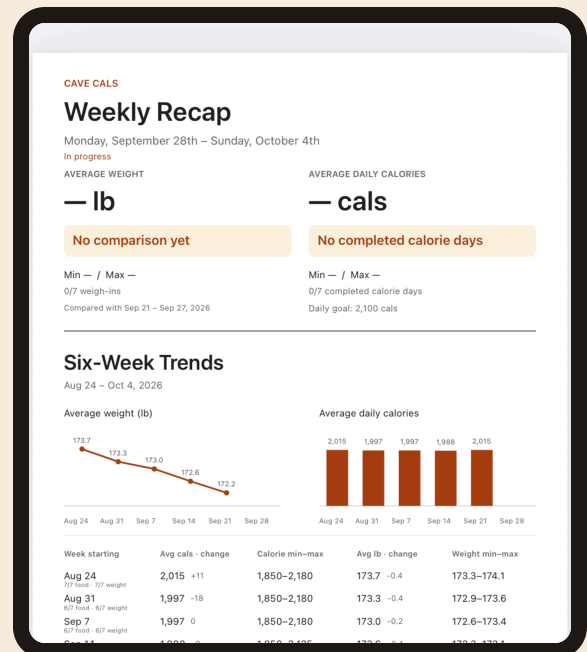

- One-tap logging of their usual foods (it learns them)
- Photo and voice logging (10 free tries; **1 free month** with your code)
- Free barcode scanning, food search, meals, and weigh-ins
- Protein, carb, and fat goals you set together
- No account or signup. Diary stays on their iPhone.

You get

- **Free Cave Cals+ for life**
- Your own code, plus **\$10 per yearly subscriber** who uses it
- A weekly one-page recap from each client: averages, macros, weight trend, six-week table
- Featured on @cavecals (optional)
- A direct line to the developer for feature requests

How it works

1. **Client installs** Cave Cals and redeems your code (2 min)
2. **Set goals together:** calories, protein, carbs, fat
3. **They log:** tap usuals, snap, say, or scan
4. **Every Sunday:** Progress → print icon → Share the Weekly Recap to you
5. **You review weekly averages**, not daily noise
